

March 22, 2023

The Honorable Robert Aderholt

The Honorable Rosa

- Strengthening and expanding funding to additional states under the National Asthma Control Program that tracks asthma prevalence, promotes asthma control and prevention and builds capacity in state programs. It is estimated that more than 25 million Americans currently have asthma, including more than 4.2 million children. The program has been highly effective: the rate of asthma has increased, yet asthma mortality and morbidity rates have decreased.
- Expanding the Climate and Health Program that currently funds nine states, two cities and three tribes to help diagnose and prepare for the serious adverse health impacts of climate change including extreme heat, more severe weather, floods, droughts, increases in air pollution and pollen and the spread of infectious and vector-borne diseases – such as Lyme disease and dengue fever. Increased funding will allow CDC to implement a 50
